FAQ

15

16

Why did weCloud Add Code Signing?

17

18

My supporting Code Signing we add another layer of security by

19

ensuring that

20

no one other than authorized persons can push updates for

21

applications.

22

23

Do we Lock Down weCloud?

24

25

The weCloud project is open source and always will be. We do not

26

want to make

27

it more difficult for our users to run weCloud. Any code signing

28

errors on

29

updates will not prevent weCloud from running, but will display a

30

warning on

31

the Admin page. For applications that are not tagged "Official" the

32

code signing

33

process is optional.

34

Not Open Source anymore?
